IT professional with a Master of Information Technology (Software Engineering) from Charles Darwin University, with experience in education-sector administration, practical ICT support and software development. Skilled in Windows troubleshooting, Microsoft 365, ICT asset management, technical documentation and resolving hardware and software issues. Completed hands-on IT support training in simulated enterprise environments covering Active Directory, Windows Server, networking, user access management, cloud services and cybersecurity. Brings strong problem-solving, communication and organisational skills, with experience supporting students, staff and stakeholders in busy educational environments. Committed to maintaining secure, reliable and accessible ICT services.

.

TECHNICAL SKILLS

- **Systems Administration:** Windows operating systems, Windows Server fundamentals, Active Directory, Microsoft Entra ID, user accounts, permissions, security groups and Hyper-V (training).
- **Microsoft 365 & Cloud Services:** Microsoft 365, Outlook, Teams, SharePoint, Exchange Online and cloud-based service administration fundamentals.
- **Networking & Connectivity:** TCP/IP, DNS, DHCP, LAN/WAN, Wi-Fi troubleshooting, routers, switches, firewalls and VPN fundamentals.
- **Cybersecurity:** Access control, data protection, vulnerability assessment, network security fundamentals, OWASP ZAP, Burp Suite and Wireshark.
- **ICT Support:** Level 1 and simulated Level 2 support, Windows devices, hardware and software troubleshooting, printers, peripherals and computer reimaging.
- **IT Service Management:** ServiceNow, osTicket, Kaseya and Jira (training), incident documentation, service requests, escalation and technical troubleshooting.
- **ICT Infrastructure:** Windows Server, Hyper-V, backup and recovery fundamentals through simulated enterprise training.
- **ICT Asset Management:** Device tracking, hardware inspections, computer identification, allocation records, storage device removal and equipment disposal support.
- **Software & Database Knowledge:** SQL, MySQL, Microsoft SQL Server, Python, Postman, Selenium and JMeter.
- **Professional Skills:** Technical documentation, stakeholder communication, problem-solving, customer service, confidentiality, teamwork and competing-priority management.

PROFESSIONAL EXPERIENCE

Darwin High School Parap, Darwin

Administration / Front Office August 2026 – Present

- Provide administrative and operational support within a busy NT Government secondary school environment.
- Respond to enquiries from staff, students, parents and external stakeholders through telephone, email and face-to-face communication.
- Assist with basic ICT troubleshooting involving computers, laptops, printers, software and peripheral devices.
- Support ICT asset management through device identification, equipment tracking, hardware checks and recordkeeping.
- Assist with computer reimaging, software installation, hardware-related tasks and basic connectivity troubleshooting when required.
- Maintain accurate records and documentation while handling confidential student and school information.
- Coordinate with school staff and relevant support teams to resolve operational and technical enquiries.
- Manage competing priorities and escalate complex technical issues to appropriate ICT personnel.

CDU Engagement Team Casuarina, Darwin

First Year Student Success Partner Sept 2025 – July 2026

- Provided student support through telephone, email and face-to-face communication.

- Assisted students with Microsoft 365, Outlook, Learnline and Blackboard learning platforms.
- Responded to account access and technology-related enquiries, escalating technical issues to ICT teams when required.
- Maintained accurate student interaction records and support documentation.
- Assisted domestic and international students from diverse cultural and educational backgrounds.
- Worked collaboratively with academic, administrative and student support teams to resolve enquiries.
- Prioritised multiple enquiries while maintaining professional and timely service delivery

EDUCATION

Master of IT - Charles Darwin University, Australia | 2026

Bachelor of Software Engineering - American International University - Bangladesh| 2021

ACADEMIC PROJECT

- **Database and Software Development Projects:** Used SQL, MySQL and Microsoft SQL Server to work with structured data, database queries and information management.
- **Application Testing Project:** Performed manual and automated testing, documented defects and tracked issues using Jira and Postman.
- **Warehouse System Testing:** Tested application functionality, reviewed data accuracy and documented testing results.
- **Software Security Assessment:** Conducted application security testing and documented findings using OWASP ZAP and Burp Suite.

ADDITIONAL TECHNICAL TRAINING

Practical ICT Support | Darwin High School

- Assisted with laptop and desktop troubleshooting, software installations and peripheral issues.
- Supported computer reimaging and basic hardware maintenance.
- Checked device identification numbers, batteries and storage devices.
- Assisted with Wi-Fi connectivity and workstation-related problems.
- Supported ICT asset tracking and equipment disposal processes.
- Referred complex technical issues to the appropriate ICT support staff.

IT Helpdesk Support Training - TechSkills IT Career Institute

- Installed, configured and troubleshot Windows operating systems, applications and peripheral equipment.
- Practised administering Active Directory user accounts, permissions, security groups and password resets.
- Worked with Microsoft 365, Exchange Online, Teams, SharePoint and Microsoft Entra ID.
- Practised Windows Server administration, Hyper-V virtualisation and backup and recovery procedures.
- Diagnosed simulated network issues involving TCP/IP, DNS, DHCP, routers, switches and wireless connectivity.
- Developed foundational knowledge of firewall configuration, secure connectivity and network security practices.
- Used ServiceNow, Kaseya and osTicket for simulated incident management, service requests and technical documentation.
- Applied troubleshooting procedures, access controls and basic cybersecurity practices

VOLUNTEERING ACTIVITIES

- **Ronald McDonald House Darwin:** Volunteer supporting families and daily activities**.**
- **The Salvation Army, Nightcliff:** Volunteer retail and front-desk customer service**.**
- **CDU IT Code Fair and Radicle:** Volunteer at a technology event
- **AWESOME & VALUE Programs - CDU Career Centre:** Built employability skills.
